

**We're a company
focused on you**

Enterey Overview 2010

Overview

Life sciences thrive upon great minds, innovative ideas and persevering innovation. At Enterey, we make sure the path to market and day-to-day operations don't distract your organization from maintaining its critical focus.

- **We're a company focused on you.** Our focus is specifically on the business operations needs of growing life science organizations
- **Proven and personalized life sciences expertise.** You'll work closely with our experts and receive their undivided attention – not their understudies'

Philosophy: We provide growing life sciences with operations solutions that allow you, and your key personnel, to maintain focus on what you do best.

Approach

Blending people, process and technology for better ops solutions

STANDARD

A holistic approach to problem solving

We take a broader view and pay critical attention to how each project affects all the interrelated aspects of your business.

We deliver stronger, more complete solutions. Our unique approach will pair the right people, with the right skill sets to run and maintain a verified process, enhanced by your new system of operations.

Sustainable results

We're able to walk away with your people able to easily sustain your new operational process. Sustainability is a true sign of project success.

Studies

Biotech Manufacturer

Employees: 245
No. of Facilities: 2
Annual Sales: 66M

- Cost Reduction

Project Management

Enterey helped identify headcount targets and operation efficiencies to support a 50% reduction in cost per gram by project end. Performance goals were met with no impact to business operations. Programs for staff to improve and build skill sets were increased and opportunities for displaced employees were made available.

Pharmaceutical Company

Employees: 122
No. of Facilities: 2
Annual Sales: 27M

- Facility Startup
- Inspection Preparation
- Technology Transfer

Project Management

Enterey helped a leading pharma company manage new facility construction, plant commissioning, and commercial product manufacturing activities leading to successful State, FDA, and EMEA approvals within the initial project timeline.

Device Manufacturer

Employees: 356
No. of Facilities: 3
Annual Sales: 110M

- New Product Launch - OEM
- Process and Development
- Training
- Lean and Six Sigma
- Manufacturing

Project Management

Enterey worked with a global medical device manufacturer to launch the design and manufacture of an infant medical device. After the launch, Lean and Six Sigma methodologies were implemented to reduce manufacturing costs.
